THE GREAT BARRIER REEF, ITS FUTURE AND YOU

The diversity of life throughout the Great Barrier Reef is internationally-recognised as being of outstanding universal value, and has helped earn the area World Heritage status.

This natural wonder houses the largest coral reef ecosystem on Earth with a stunning array of habitats including coral cays, continental islands, mangrove forests, estuaries, seagrass meadows, sponge gardens and deep oceanic waters.

Almost the entire Great Barrier Reef ecosystem is included within two marine parks. The Australian Government's Great Barrier Reef Marine Park extends over 2300 kilometres and covers 344,400km². This Marine Park is complemented by the Queensland Government's Great Barrier Reef Coast Marine Park in adjacent Queensland waters.

Both provide the balance between protecting the Reef's ecosystems while supporting a wide range of ecologicallysustainable uses.

The Australian and Queensland governments are committee to the long-term health of the Reef and know its future depends on the actions we take now. Pressures such as the

MARINE PARK ZONING EXPLAINED

Marine Park zoning is an important component in managing marine areas. It is a key strategy for improving the Great Barrier Reef's health and resilience and has been developed in a way widely considered to be best practice. A healthy and productive Reef provides substantial benefits to local communities and the wider economy

Zoning Plans are key pieces of legislation Reef users need to adhere to. The Australian Government's Great Barrier Reef Marine Park Zoning Plan 2003 and the Queensland Government's Marine Parks (Great Barrier Reef Coast) Zoning Plan 2004 define what activities can occur in which locations. The zoning plans provide for a range of ecologically sustainable recreational, commercial and research opportunities and for the continuation of traditional activities.

Each zone has different rules for what activities are allowed, what's prohibited and what requires a permit. Zones may also place restrictions on how some activities are conducted. Make sure you also check Special Management Areas on each map (see below), as they can change what's allowed in each zone. To safeguard the future health of the Reef, non-compliance with zoning rules is taken seriously and penalties apply.

Rules for commercial fishing can differ to recreational fishing. Commercial fishers should consult the zoning plans for more information. Here is an overview of the zones:

GENERAL USE (LIGHT BLUE) ZONE

The Light Blue Zone provides opportunities for reasonable

use, while still allowing for the conservation of these areas

HABITAT PROTECTION (DARK BLUE) ZONE

Dark Blue Zones protect sensitive habitats by ensuring the are generally free from potentially damaging activities. Trawling is not permitted in Dark Blue Zones.

CONSERVATION PARK (YELLOW) ZONE

Yellow Zones allow for increased protection and conservation of areas while allowing for limited extractive use. Fishing is limited to one line and one hook per person, and trolling with a maximum of three lines per person and a total of six hooks is permitted (see fishing definitions).

BUFFER (OLIVE GREEN) ZONE

In Olive Green Zones, trolling for pelagic fish species is the only form of extractive activity allowed. Examples of pelagic species are marlin, trevally, mackerel, tuna, wahoo and cobia.

SCIENTIFIC RESEARCH (ORANGE) ZONE

Orange Zones allow for scientific research in areas undisturbed by extractive activities. One type of Orange Zone is shown on the maps as green with an orange outline. While public access is allowed, a permit or accreditation is required to conduct research in this type of Orange Zone. The second type of Orange Zone, shown as solid orange on the maps, is a Restricted Access Area and public access is not allowed. There are presently two of these Orange Zones, one adjacent to the Australian Institute of Marine Science near Townsville (Map 7) and the other at One Tree Island Research Station in the Capricorn Bunker Group (Map 18).

MARINE NATIONAL PARK (GREEN) ZONE

impacts of climate change, declining water guality and coastal

development are dominant threats to the Reef's future.

We all have a responsibility to protect the Reef for future

more important. While numerous steps are underway to

mitigate the threats and build resilience, you can do your bit

by using this map to understand the zoning rules and what's

allowed, by adopting Responsible Reef and Island Practices

Most recreational visitors to the marine parks will not need

a permit. The types of activities that require permits include

craft such as a hovercraft, most commercial activities such as

issued jointly by the Great Barrier Reef Marine Park Authority

(QPWS), part of the Department of Environment and Science

tourist operations and some types of research. Permits are

(the Authority) and Queensland Parks and Wildlife Service

assessments@gbrmpa.gov.au or visit www.gbrmpa.gov.au.

(DES). For more information, contact the Authority via

installing structures and works such as moorings, using specific

when in the marine parks, and by reducing your carbon

footprint to support global action on climate change.

WILL YOU NEED A PERMIT?

generations. As a user of the marine parks, your role is even

Green Zones are 'no-take' areas where extractive activities such as fishing or collecting are prohibited. Anyone can enter a Green Zone for low impact activities such as boating, swimming, snorkelling and sailing. Travelling through a Green Zone with fish on board is allowed, provided the fish were caught outside the Green Zone and your fishing gear is appropriately stowed or secured (see fishing definitions).

PRESERVATION (PINK) ZONE

Pink Zones are the most restrictive type of zone and are strictly 'no-go' areas. You cannot enter a Pink Zone without a permit and all extractive activities are strictly prohibited. Research may only occur in a Pink Zone with a permit.

COMMONWEALTH ISLANDS ZONE (CREAM ON MAP)

There are 70 Commonwealth islands that together form the Commonwealth Islands Zone. They are the only land component of the Great Barrier Reef Marine Park. The Zone includes intertidal areas and extends down to the mean low water mark on these Commonwealth islands.

ESTUARINE CONSERVATION ZONE (BROWN ON MAP)

The Estuarine Conservation Zone provides for the protection of estuarine areas of Queensland's Great Barrier Reef Coast Marine Park in a natural state while allowing the public to appreciate and enjoy the relatively undisturbed nature of those areas, maintain fisheries production and use, and provide for traditional fishing, hunting and gathering. Line fishing and crabbing are allowed in this zone.

EXTRA PROTECTION: SPECIAL MANAGEMENT AREAS

Special Management Areas manage access or use of a specific area and are an **additional layer of protection on top of zoning.** There are different types of Special Management Areas across the marine parks and these are shown on the relevant zoning maps. Detailed boundary descriptions for the Special Management Areas are found in the Great Barrier Reef Marine Park Regulations 2019. You are strongly encouraged to get to know any Special Management Area requirements that apply to the area you are visiting. These Special Management Areas apply to this map:

Public Appreciation Area: Spearfishing is prohibited in the Conservation Park (Yellow) Zones that lie within the Whitsunday Public Appreciation Area. Limited spearfishing is permitted in the Light Blue and Dark Blue Zones that lie within the Public Appreciation Area (provided they are not part of a Queensland Fisheries spearfishing closure area). Harvest fisheries, such as commercial aquarium fish collecting, coral harvesting, beachworm harvesting and aquaculture operations, are also prohibited in the Conservation Park (Yellow) Zones within the Whitsunday Public Appreciation Area. Find a map that combines all the rules to clearly show where you can and can't spearfish in the Whitsundays at

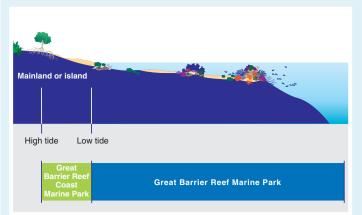

main Catalina wreck and outlying artefacts is located 24 kilometres from Bowen in a General Use (Light Blue) Zone. The coordinates are noted on the map (right).

Boaters can transit through the special management area, but generally cannot stop unless in an emergency and cannot conduct any fishing activity or anchor. Apply for a permit from the Great Barrier Reef Marine Park Authority to conduct further activities, including monitoring.

THE WHITSUNDAYS PLAN OF MANAGEMENT

The Whitsundays Plan of Management covers some areas of this map. The Whitsunday Planning Area is marked by a thick unbroken purple line on the zoning map. Rules relating to motorised water sports, anchoring, mooring and vessel/aircraft restrictions are in place to protect locations and species vulnerable to high levels of use. **Motorised water sports are prohibited around most** islands and reefs. Visit www.gbrmpa.gov.au for more information.

MARINE PARK BOUNDARIES

The Australian Government's Great Barrier Reef Marine Park extends seaward from the low water mark. The Queensland Government's Great Barrier Reef Coast Marine Park lies adjacent and generally extends landward to the high water mark or extent of the tide. Most rivers, creeks, intertidal areas and estuaries are considered to be Queensland waters, as are internal waters like Hinchinbrook Channel. For a description of where this Marine Park boundary is located, particularly in areas such as river and creek crossings, see Schedule 2 of the Marine Parks (Declaration) Regulation 2006 available from www.legislation.qld.gov.au.

The two marine parks generally have complementary zoning zone boundaries for the Great Barrier Reef Marine Park. This means activities that can occur in the Great Barrier Reef Schedule 1 of the Marine Parks (Great Barrier Reef Coast) Zoning Marine Park (Commonwealth) are also allowed in the adjacent Plan 2004 describes zone boundaries for the Great Barrier Reef Coast Great Barrier Reef Coast Marine Park (Queensland). Some Great Marine Park. Please note that the coordinates do not change, even Barrier Reef Coast Marine Park zones extend into estuaries or if coastal features near them – such as sand spits or river mouths – mangrove forests — these are shown on the zoning maps. change or move over time. Find detailed zoning rules for the Great Barrier Reef Marine Park

RECREATIONAL FISHING GUIDE

Note: Special Management Area (SMA) rules also apply to fishing. This guide must be read in conjunction with Special Management Area information provided on these maps, as SMA requirements can change what's allowed in each zone.

FISHING DEFINITIONS

Trolling Trolling is line fishing that occurs behind a vessel that is underway. A vessel is considered underway only if it is being propelled through the water in a forward direction (whether by engine, sail or human power) and the vessel is not adrift.

Line fishing A maximum of three hand-held rods or handlines and six hooks per person is allowed when line fishing in the General Use (Light Blue), Habitat Protection (Dark Blue) and Estuarine Conservation Zones. In Conservation Park (Yellow) Zones, all fishing – other than trolling – is restricted to limited line fishing, which means using a maximum of one hand-held line or rod per person with a maximum of one hook. One hook One hook can be

One nook one nook can be.	
A single hook, single-shanked double or treble hook	A squid j
A ganged set of hooks, of no more than six hooks (each of which is in contact with at least one of the other hooks in the set)	A bait jig sized be Number

conto

Stowed or secured

Gear that is used for fishing must be stowed or secured while in a zone where the use of the equipment is not permitted. For example, you can travel through the Marine National Park (Green) Zone with fishing gear on board provided that all fishing lines are stowed or secured – that is – any line or hand-held rod is rendered inoperative and stowed or secured inboard the boat and completely out of the water.

If a vessel is navigating through a zone where the use of trawl equipment is prohibited, equipment must be stowed or secured in accordance with the Great Barrier Reef Marine Park Regulations 2019. **Commercial fishers should consult the zoning plans** or contact the Authority or QPWS for more information.

RECREATIONAL FISHING, SPEARFISHING, CRABBING, BAIT NETTING AND COLLECTING imited collecti

Line fishing and trolling Maximum three lines with a combined total of six hooks per person.

- Trolling must occur behind a vessel that is underway) ✓ In General Use (Light Blue), Habitat Protection (Dark Blue)
- and Estuarine Conservation Zones
- ✓ In Conservation Park (Yellow) Zones Limited line fishing (one line, one hook – see diagrams above)
- In Conservation Park (Yellow) Zones trolling with maximum three lines and combined total of six hooks
- ✓ In Buffer (Olive Green) Zone trolling for pelagic fish species is the **only form of fishing allowed**. Seasonal closures apply in the Ribbon Reefs Buffer Zone
- **X** Prohibited in all other zones

Bait netting

- ✓ In General Use (Light Blue), Habitat Protection (Dark Blue), Conservation Park (Yellow) and Estuarine Conservation Zones
- **X** Prohibited in all other zones

Crabbing (trapping)

(Maximum of four pots, dillies, collapsible traps per person) In General Use (Light Blue), Habitat Protection (Dark Blue), Conservation Park (Yellow) and Estuarine Conservation Zones

X Prohibited in all other zones

In all zones where fishing is allowed, Queensland Fisheries legislation (e.g. size and bag limits, gear restrictions, protected species, closed seasons) also applies. Contact Fisheries Queensland for more detail. See the contact section on this map or visit your local Queensland Boating and Fisheries Patrol office.

SPECIAL NOTE: SPEARFISHING IN THE WHITSUNDAYS

As mentioned in the Special Management Area section, spearfishing is permitted in the General Use (Light Blue) Zone and Habitat Protection (Dark Blue) Zone in the Whitsundays Public Appreciation Area, provided they're not part of a Fisheries Queensland spearfishing closure area. Spearfishing is prohibited in the Conservation Park (Yellow) Zones that lie within the Whitsundays Public Appreciation Area. Find a map that combines all the rules to clearly show where you can and can't spearfish in the Whitsundays at www.gbrmpa.gov.au.

BE PEST FREE

Our precious Great Barrier Reef World Heritage islands are among the most pest-free islands in the world. They need your help to stay this way. Before you visit, please check that your boat, clothing, footwear and gear are free of soil, seeds, parts of plants, eggs, insects, spiders, lizards, toads, rats and mice.

3e	sure to:
	Line and state

- Unpack your camping gear and equipment and check it carefully, as pests can hide here • Clean soil from footwear and gear as invisible killers such as viruses, bacteria and fungi are carried in soil • Check pockets, cuffs, and hook-and-loop fasteners (e.g. Velcro) for seeds.
- While you're on the islands; remove soil, weeds, seeds and pests from your boat, gear and clothes before moving to a new site.

Wrap seeds and plant material, and place them in your rubbish. Everyone in Queensland has a general biosecurity obligation to minimise the risks posed by their activities. This includes the biosecurity risk of introducing and spreading weeds and pests to island national parks.

e Cultural Heritage on Area coordinate Habitat Protection

at www.gbrmpa.gov.au, or the Great Barrier Reef Coast Marine Park at www.des.qld.gov.au.

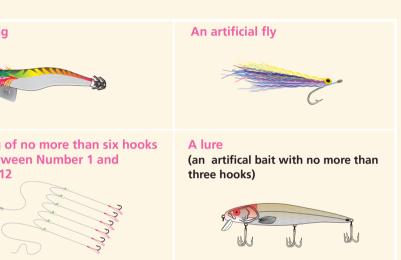

NAVIGATING ZONE BOUNDARIES

Zone boundaries are described with a coordinate-based system that uses points of latitude and longitude (referenced to the Geocentric Datum of Australia 1994, known as GDA94). On the water, zone boundaries can be identified using navigational aids such as Global Positioning Systems (GPS) and plotters. Ensure your GPS is set to either GDA94 or WGS84 as these are functionally equivalent. Know how zoning is displayed on your GPS.

A number of products are available to help you determine zone boundaries. This map marks key coordinates for the Green and Pink Zones. You can download all zone boundary coordinates in a number of formats on the Authority's website.

Even without a GPS, you can still determine your position relative to most coastal zone boundaries. Green Zones close to the coast are mostly simple shapes and boundaries can usually be lined up with recognisable coastal features such as headlands. Zone boundaries have also been oriented north, south, east and west as much as possible for ease of navigation.

You need to be aware that the coast is a natural feature which may change due to climatic influences and other natural factors. The primary reference for zone boundaries is the legislation. Schedule 1 of the Great Barrier Reef Marine Park Zoning Plan 2003 describes

(The taking of an animal or plant by hand or hand-held implement that is not motorised or pneumatically or hydraulically operated)

- Generally no more than five of any one species (except coral) can be taken in General Use (Light Blue), Habitat Protection (Dark Blue), Conservation Park (Yellow) and Estuarine Conservation Zones, except when collecting bait or oysters for immediate use or consumption
- X All collecting prohibited in all other zones

X The collection of coral (alive or dead) is strictly prohibited throughout the marine parks

Limited spearfishing

(Limited spearfishing means fishing with a spear or speargun not using a powerhead, a firearm, a light or underwater breathing apparatus other than a snorkel)

- ✓ In General Use (Light Blue), Habitat Protection (Dark Blue) and Estuarine Conservation Zones
- ✓ In Conservation Park (Yellow) Zones that are **not** declared Public Appreciation Special Management Areas
- **X** Prohibited in Conservation Park (Yellow) Zones declared Public Appreciation Special Management Areas
- **X** Prohibited in all other zones

ANCHORING AND MOORING

habitats and avoid anchoring on coral – look for sand instead (see the Responsible Reef and Island Practices section on this map). In some high-use areas, public moorings are available. These blue beehive-shaped buoys are used on a first-come first-served basis – no booking is needed, but time limits apply. Designed to suit different-sized vessels, the colour-coded band and information on the buoy and the pick-up line helps you determine if it will be suitable for your vessel. Penalties and rules prevent misuse of public moorings. Visit www.gbrmpa.gov.au.

No-anchoring areas are in-place in some high-use locations t0 further protect fragile coral. Generally they are marked with reef gbrmpa.gov.au for mooring and no-anchoring area locations.

HOW TO BEHAVE AROUND MARINE ANIMALS

The Great Barrier Reef is a refuge for many marine animals of conservation concern. For a number of species, the Reef is vital for their survival and recovery. You can help protect these species by following these Responsible Reef and Island Practices. To report sick, injured or stranded marine animals phone DES Hotline 1300 130 372.

TURTLES AND DUGONG

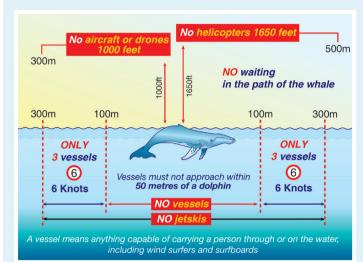

reefs and seagrass meadows

crabbi

WHALES AND DOLPHINS

Watching whales and dolphins can be exciting but approach distances must be respected both for the animals' safety and your own. In the Whitsunday whale protection area, vessels must stay 300 metres away from a whale.

- Be alert and watch out for whales and dolphins at all times, particularly May to September
- Slow down to minimise the risk of collision and do not intentionally bring a boat between a pod of whales or dolphins, or restrict their path of travel
- Let the whale or dolphin control the encounter never to to round up or herd, or try to get dolphins to bowride
- Avoid disturbing mothers and their calves and do not approach closer than 300 metres to a whale calf or 150 metres to a dolphin calf.

WHALES IN THE WHITSUNDAYS

The Whitsunday area is an important calving ground for humpback whales between May and September each year. Most of the water around the islands is part of the Whitsunday whale protection area designated under the Great Barrier Reef Marine Park Regulations 2019. Marked by a dark blue dashed line on the map, this area is designed to minimise disturbance to these vulnerable animals. Within the whale protection area, vessels must not approach within 300 metres of a whale. Commercial whale watching activities are also prohibited. Visit www.gbrmpa.gov.au for more information. In addition to this, an Area of Special Interest for whales is declared in the same area under Queensland Government legislation. For more information visit www.qld.gov.au.

VISITING ISLANDS AND COASTS

The Great Barrier Reef World Heritage Area includes around 1050 islands, ranging from high continental islands to sandy or coral cays. Some periodically change shape and size and many of these islands are national parks. These islands and the beaches, along with many mainland coastal areas, are places where birds roost and nest and where marine turtles lay their eggs. Many islands are available for you to explore responsibly. whether camping or walking. QPWS manages all national park islands, from highly-visited inshore islands to remote coral cays of the outer Reef. Contact QPWS for more information.

THE WHITSUNDAYS AREA

The greater Whitsundays area encompasses six national parks: Whitsunday Islands National Park: Comprising a series of hilly islands dotting aquamarine waters of the scenic Whitsunday passage, Whitehaven Beach — on Whitsunday Island — is renowned for its pure white silica sand and crystal-clear water. Walk from Tongue Bay, on Whitsunday Island, for spectacular views. See the Ngaro people's precious rock art at Nara Inlet, on Hook Island. Camping is permitted on Whitsunday, Hook and Henning islands. Molle Islands National Park: In the heart of the Whitsundays,

numerous walking tracks. Camp in scenic settings on South Molle, North Molle, Planton, Denman, Tancred and Long islands. Lindeman Islands National Park: With well-maintained tracks traversing Lindeman and Seaforth islands, the northern waters of these outer islands are usually clearer for snorkelling. Birdlife

South Molle is the largest in the group. This island group is

renowned for white sandy beaches, extensive grassy knolls and

pockets of rainforest. Enjoy stunning views along South Molle's

is prolific. The sunset over Neck Bay and views from Lindeman's Mount Oldfield can be spectacular. Camping is permitted on Lindeman and Shaw islands. Gloucester Islands National Park: Offering a more remote

experience and a quiet retreat, Gloucester Island's Bona Bay has the largest campground, facilities and good anchorage. Camping is also permitted on Armit and Saddleback islands.

Repulse Islands National Park: Protecting three islands south of Cape Conway, it overlooks the Lindeman Islands. Camping is permitted on South Repulse Island only.

Holbourne Island National Park: An isolated island, this is the most northerly national park island in the Whitsundays. It's a major nesting site for green and flatback turtles, and an important breeding habitat for several bird species. Camping is not permitted.

SIGNIFICANT BIRD SITES AND SEABIRDS

A number of islands and rocks in the Whitsundays are important for seabirds, shorebirds and several migratory species. Access to these areas may have seasonal or permanent restrictions (see table below).

LOCATION OF BIRD SITE	NO ACCESS	VESSEL SPEED LIMITS
Armit Island (southern beach only) Armit Islets (No 1) Double Cone Island (western island only) Grassy Island (southern beach only) Shaw Island (beach east of Burning Point) South Repulse Island (western beach only)		6 knots: 1 October–31 March
Bird Island		6 knots: all year
East Rock Edwin Rock	1 October–31 March	6 knots: 1 April–30 September
Olden Rock (south of Olden Island)	1 October–31 March	

Please note: A Preservation (Pink) Zone surrounds Eshelby and Little Eshelby islands and entering this zone is not allowed without a permit.

protection markers, which are white pyramid-shaped buoys with blue marine parks labels. Do not tie up to, or use reef protection markers as a mooring. Penalties apply.

While no-anchoring areas are generally permanent, temporary no-anchoring areas may be located where damage such as coral bleaching has occurred. Please observe no-anchoring areas wherever they are placed. On this map, no-anchoring areas are associated with Border, Daydream, Hayman, Hook, Black, Dumnell, Haslewood, South Molle, Whitsunday and Langford islands, and Bait Reef. **Note:** the no-anchoring areas at Bait Reef and Manta Ray Bay, Hook Island are unmarked. HELP PROTECT THE REEF

The Great Barrier Reef ecosystem is at a crossroads and the actions we take now will determine its long-term future. There are significant challenges ahead for the Reef to remain one of the world's healthiest ecosystems. Pressures such as impacts from climate change and declining water quality will largely dominate the Reef's future health. How the Reef responds will depend on its ability to withstand and adapt to these pressures and the actions we each take.

Before heading out to the marine parks, or to an island, run through the following checklists and refer to the Responsible Reef and Island Practices section on this map for information that will help you protect these special places.

RESPONSIBLE REEF AND ISLAND PRACTICES ACROSS THE WORLD HERITAGE AREA

Observing zoning rules is one way you can help to look after the Reef. By following Responsible Reef and Island Practices you will also help to maintain the World Heritage Area in good shape into the future. They are common sense and apply regardless of where you visit. To learn about more ways to help the Reef and islands go to www.gbrmpa.gov.au or www.des.qld.gov.au.

ANCHORING AND MOORING

Dropping an anchor on coral takes seconds to damage or destroy and many

- years for it to rebuild. • Use public moorings where available and observe no-anchoring areas - they
- are there to protect coral • Where possible, anchor in sand or mud away from corals and other fragile marine environments. Suitable areas often show up as flat and smooth on your sounder
- Use your sand anchor and reef pick appropriately to minimise damage
- Use only as much chain as you need to hold the vessel without compromising safety
- Keep watch to make sure the anchor is not dragging.

- Take only the fish you need Return all undersized or unwanted fish to the water carefully and quickly to minimise injury
- Do not use pest or non-native fish for bait. Choose locally caught bait products as imported bait can increase the risk of introducing disease or pest species.

- Always ensure your boat is well maintained. Carry all necessary safety equipment and make sure everyone on board knows where it is stowed
- Slow down around shallow coral reefs, seagrass beds and beaches
- do so well away from reefs and islands. For information on vessel sewage regulations visit www.gbrmpa.gov.au
- Refuel on shore wherever possible. Use the correct gear and have spill response equipment readily available.

DIVING OR SNORKELLIN

• Be mindful of all marine life. Do not touch, prod or chase them and avoid making loud noises.

increasingly devastating impact on our

- Stow your rubbish onboard and collect any you find
- Take all rubbish back to the mainland with you — there are no bins on national park islands
- When at home, recycle what you can and ensure all other rubbish ends up in the bin.

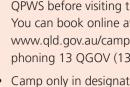

RESPECT OTHERS

- Try to match your activities to the environment around you and be particularly conscious of the amount of noise you are making
- Learn about and respect Traditional Owner culture and their connections to sea country.

nd experiences in the Great Barrier Reef W

ponsible and 'reef smart' way.

You can book online at (beaches) or rodents from your camping gear, Where there are no toilets, walk at least 100 meters from campsites or watercourses and bury all faecal waste seabirds and turtles food — do not leave food or scraps overhanging the water and during the breeding season, September to April.

- and tidal lands

CAMPING Obtain your camping permits from QPWS before visiting the islands. www.qld.gov.au/camping or by phoning 13 QGOV (13 74 68) Camp only in designated campsites and always display your campsite tag • Use non ash-producing fuel stoves for cooking. Open fires are not permitted on national park islands. WHEN VISITING NATIONAL PARK ISLANDS • Fires are prohibited in the island national parks adjoining intertidal areas • Leave your pets at home. Domestic animals are not permitted on national park islands and all adjoining beaches • Remove aliens such as seeds, insects clothes and shoes before visiting an Always use toilets where provided. at least 15 centimetres deep • Respect the islands. Do not graffiti facilities, headlands or other natural and cultural attractions • Check if generators or compressors are permitted at the site you intend to visit and the conditions that apply. On most islands they are not permitted. WHEN WATCHING WILDLIFE noises or moving suddenly near nesting Allow native animals to find their own around your campsite. Feeding wildlife is prohibited. **BE CROC WISE IN CROC** COUNTR reaches of rivers, as well as in fresh water sections of lagoons, swamps and waterways up to hundreds of kilometres beaches, around islands and cays and even in offshore areas far from the coast. • Obey crocodile warning signs. They are there for your safety and protection • When fishing, always stand a few metres back from the water's edge and never stand on logs or branches • Never clean fish or discard fish scraps near the water's edge or at boat ramps • Camp at least 2 metres above the high water mark and at least 50 metres from the water's edge • Be more aware of crocodiles at night **SAFETY WARNINGS** Protect yourself from biting insects and wear insect repellent. Marine stingers (jellyfish) may be present all year, and are prevalent from October to May. Wear protective clothing. Heed
