

GREEN ZONES

FOR A MORE RESILIENT REEF

DID YOU KNOW **GREEN ZONES**
RECOVER **UP TO 20% FASTER** THAN
BLUE ZONES FROM IMPACTS INCLUDING:

Coral
bleaching

Coral
disease

Crown-of-
thorns starfish
outbreaks

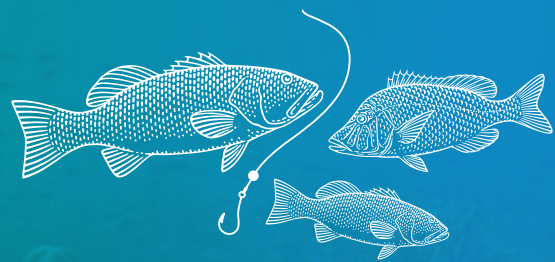

Weather
events

THE 'SPILLOVER' EFFECT

GREEN

Protecting larger
breeding stock in
green zones

BLUE

means more
fish in areas
open to fishing.

A 50cm coral trout can produce more than
3x as many eggs as a 35cm coral trout.
