PART TWO - GENERAL PROVISIONS

3 ZONES AND AREAS3.1 Zones

(1) For the purposes of the Act, the Central Section is divided into zones in accordance with this clause.

(2) Subject to clauses 3.1(3) and (4), so much of the areas described in Column 2 of an item in Schedule One as are within the Central Section together constitute a zone having the name set out in Column 1 of the item.

(3) Where a part of a boundary of a zone is described by reference to a line every point of which is a particular distance seaward from the nearest point of the reef edge of a reef and that line intersects the reef edge of another reef then the boundary of the zone shall be the median line between those reefs.

(4) Where a part of a boundary of a zone is described by reference to a line every point of which is a particular distance seaward from the nearest point of the reef edge of a reef and that line intersects a part of a boundary of another zone (being a part of a boundary described by reference to a line every point of which is also that distance seaward from the nearest point of the reef edge of another reef) then the boundary of each of those zones between the outermost points at which those lines intersect shall be the median line between those reefs.

(5) To assist readers of this Zoning Plan, the approximate locations of reef edges are indicated on the Zoning Maps by the reef edge lines.

3.2 Notation of Zones on Zoning Maps

To assist readers of this Zoning Plan, the approximate locations of the zones described in clause 3.1 are indicated on the Zoning Maps in accordance with the following table:

Column 1	Column 2
Name of Zone	Notation on Zoning Maps
General Use 'A' Zone	Light Blue
General Use 'B' Zone	Blue
Marine National Park 'A' Zone	Yellow
Marine National Park 'B' Zone	Green

3.3 Areas of Periodic Restricted Use

(1) Replenishment Areas

Within the General Use 'A' Zone and General Use 'B' Zone there may be Replenishment Areas. The objective of a Replenishment Area is to provide, for a specified period of time, an area which is closed to activities, other than trolling for pelagic species or permitted research,

which remove living resources of the Marine Park to enable the recovery of fish and other resource stocks.

The responsible agency may declare one or more of the areas comprised within the following groups of areas to be a Replenishment Area or to be Replenishment Areas, as the case may be, during such period as is, or such periods as are, specified by the responsible agency. Within each group of areas only one area may be declared to be a Replenishment Area at any one time.

3.5 Closure of Limited Areas

(1) Reef Appreciation Areas

Within the General Use 'A' Zone, General Use 'B' Zone and Marine National Park 'A' Zone there may be Reef Appreciation Areas. The objective of a Reef Appreciation Area is to provide, on and around a heavily used reef, a small area in which the public may observe and appreciate relatively undisturbed marine life. Within such areas, fishing and collecting are not allowed.

The responsible agency may declare an area to be a Reef Appreciation Area during such period as is specified by the responsible agency. The Reef Appreciation Area or Areas for the time being declared in relation to a reef may not incorporate more than 20 percent of the area of that reef, nor more than 20 percent of the area enclosed within the 500 metre line around that reef.

The locations of Reef Appreciation Areas are not shown on the Zoning Map.

(2) Reef Research Areas

Within the General Use 'A' Zone, General Use 'B' Zone, Marine National Park 'A' Zone, and Marine National Park 'B' Zone there may be Reef Research Areas. The objective of a Reef Research Area is to provide, on and around a reef, a small area in which permitted research may be conducted undisturbed.

The responsible agency may declare an area to be a Reef Research Area during such period as is specified by the responsible agency. The Reef Research Area or Areas for the time being declared in relation to a reef may not incorporate more than 20 percent of the area of that reef, nor more than 20 percent of the area enclosed within the 500 metre line around that reef.

The locations of Reef Research Areas are not shown on the Zoning Map.

3.6 Aircraft Landing Areas

Within the General Use 'A' Zone, General Use 'B' Zone, Marine National Park 'A' Zone, and Marine National Park 'B' Zone there may be Aircraft Landing Areas. The objective of an Aircraft Landing Area is to make provision, in the interests of public safety and enjoyment of the reef environment, for an area where aircraft may land and take-off.

The responsible agency may declare an area to be an Aircraft Landing Area during such period as is specified by the responsible agency.

The locations of Aircraft Landing Areas are not shown on the Zoning Map.

3.7 Shipping Areas

Within the General Use 'B' Zone, Marine National Park 'A' Zone, and Marine National Park 'B' Zone there may be Shipping Areas. The objective of a Shipping Area is to make provision for the navigation and operation of ships.

The areas described in the Column in Schedule Two are Shipping Areas.

The responsible agency may declare any other area to be a Shipping Area.

3.8 Notation of Areas of Periodic Restricted Use, Defence Areas and Shipping Areas on the Zoning Map

To assist readers of this Zoning Plan, the approximate locations of the areas capable of being declared as Areas of Periodic Restricted Use, Defence Areas, and those Shipping Areas described in Schedule Two are indicated on the Zoning Map in accordance with the following table:

Column 1	Column 2
Name of Area	Notation on Zoning Maps
Replenishment Area	Grey dashed line around boundary
Defence Area	Grey line around boundary
Shipping Area	Thin black dashed line around boundary

3.9 Navigation in Shipping Areas

CAUTION. Because shipping areas can be located outside shipping lanes these areas could contain reefs and other hazards to navigation.
