

ANCHORING AND MOORING

Offshore Mackay

The Great Barrier Reef is a nautical paradise. As you navigate the waters offshore Mackay, please keep your ripple effect small by practising careful anchoring and mooring.

Doing so helps ensure the region remains enjoyable for everyone while protecting its delicate marine habitats, like coral reefs.

This guide provides vital information on anchoring and public moorings, along with key practices to safeguard this remarkable natural wonder for future generations.

Responsible practices

- **Use suitable moorings** whenever possible. Approach moorings carefully and avoid damaged moorings.
- **Anchor in sand or mud**, away from coral, when moorings aren't available. Use only the necessary chain and line.
- **Avoid feeding fish** at moorings to help ensure a safe and sustainable environment for all.

Public moorings

Public moorings are available at popular locations throughout the region. These blue cone-shaped buoys have a colour-coded band indicating class (vessel length), time limits and wind strength limits.

Using moorings

- Moorings are first-come, first-served.
- Use the right mooring suited to your vessel and weather conditions.
- Only one vessel per public mooring; attach at front.
- Observe time limits (usually two hours, four hours or 24 hours).
- Vacate when your time is up; overnight stays are from 3 pm to 9 am.

Private moorings are also in the area and can be identified by colours such as white, fluorescent pink, orange or yellow. These require the owner's permission before use.

No-anchoring areas

No-anchoring areas protect coral reefs from anchor damage and are indicated by reef protection markers—white pyramid-shaped buoys with a blue label. There are five no-anchoring areas in this region, located at:

- Refuge Bay, Scawfell Island
- West Refuge Bay, Scawfell Island
- Keswick Island
- Homestead Bay, St Bees Island
- Turtle Bay, St Bees Island

Anchoring with care

- You may enter these areas; however, never anchor inside of markers.
- Anchoring is allowed on beaches if no tidal restrictions.
- Do not attach your vessel to reef protection markers; they are not designed for that purpose.

It is an offence to damage coral in the marine parks.

Public mooring	Colour code	Class	Max. vessel length		Max. wind speed
	Brown	T	6m tender only		24 knots
					
	Yellow	A	10m	9m	24 knots
	Green	B	20m	18m	34 knots
	Blue	C	25m	22m	34 knots
	Red	D	35m	30m	34 knots

Disclaimer: The published positions are correct to the best of the Great Barrier Reef Marine Park Authority and the Queensland Parks and Wildlife Service's knowledge at July 2024. No guarantee is given that the moorings are in the location shown in the table. Vessel skippers should verify the mooring positions with their own GPS equipment prior to attempting to access the moorings. Particular care should be taken in accessing the moorings in poor weather, reduced visibility or at night.

Instructions to vessel masters:

1. Vessel masters are solely responsible for the safety of their vessel while using the public moorings.
2. A watch must be kept at all times while the vessel is on the mooring.
3. Be aware of changing weather and sea conditions and your proximity to obstacles, including coral and other vessels, and how these may be affected by mooring swing.
4. Refer to instructions specified or included on the tag or buoy.
